25X1

1. Odra Port is a new fishing harbor under construction. A portion of it is completed and in use. It is planned to move the entire Dalmor (State Fishing Enterprise) organization into this harbor. Dalmor is presently located in Gdynia. 25X1
2. The portion of the harbor which is already completed is about 300 meters in length. Depth is unknown however a freighter with a draft of 15 feet entered this harbor in May 1952 and maneuvered in the harbor without difficulty. 25X1
3. The portion of the harbor which is still under construction is about 700 meters long.
4. The wooden buildings now in the harbor area are to be replaced with stone buildings in the future.
5. A fish cannery and an ice factory are to be built for this harbor.
6. A ship repair yard and a dry dock for fishing vessels are also planned for construction, but in May 1952 no building activity was observed.
7. The site for the harbor was poorly selected since the ground consists of loose sand. As a result of this, a newly-constructed building collapsed in 1951.
